

Additional Configurations to offline Projections

IFS Cloud Mobile Projections require additional Configurations compared to other Projection Configurations. Those additional Configurations will be done in the **Projection Configuration** detail view.

If the configured Projection is an **Offline Projection**, users can add Sync Policies to each and every Entity that has been added to the Projection. One Entity can have only one Sync Policy and User can modify the Sync Policy by enabling the *Modify Sync Schedule* command upon choosing the row (for more information on Sync Policies refer [Synchronization Rules](#)).

Custom Logical Units

	Custom Lu	Custom Entity	Entity Set	Operations Allowed	Configuration Approved	Configuration Published
	NewTestLU - New Test ...	NewTestLU	NewTestLUSet	(3) Read; Create; Update		No

SYNC POLICY

Modify Sync Schedule

	Sync Policy	Sync Group	Transaction Group	Sync Schedule	
☒	Batch	Batch Group	Batch Transaction Group	DAILY AT 00:00	

Note: Sync Scheduling will be only enabled for **Batch** and **Push** sync policies.

In **Offline Projections**, users can add Sync Policies to Custom Actions as well. After the Custom Action is added, Sync Policy can be added in **Projection Configurations** detail view.

Note: Custom Actions can only have **Online** and **Offline** Sync Policies.

Custom Actions

		Action Name	PL/SQL Method	LU Dependencies	Sync Policy	Action Approved	Action Publish...
